EXPERIENCE

•NatWest Group

May 2026 – Jul 2026

Software Engineering Intern

India

- Cut endpoint/scenario test time from 5 hours to 35 minutes, freeing QA to focus on production issues instead of repetitive checks replacing slow, resource-intensive manual QA that couldn't scale across environments by automating unit and SIT test suites in Java (Cucumber, BDD).
- Gave managers and developers real-time visibility into test results without digging through logs, the lack of which caused delayed issue tracking by configuring parallel pipeline jobs per test type and integrating XML test reports as GitLab artifacts with Grafana dashboards.

PROJECTS

•AI SCAM-AWARENESS SIMULATION GAME | LINK

Jul 2026

- Spread awareness about online scams and frauds by building a full-stack AI-powered scam-awareness simulation game solo.
- Kept the scam simulation immersive even under direct jailbreak attempts by adding a keyword-based guardrail layer that deflects meta-probes in-character.
- Prevented architectural drift as the codebase grew by enforcing hexagonal (ports-and-adapters) layering through custom ESLint import-boundary rules.

•AI-POWERED EV BATTERY HEALTH & SECURITY DASHBOARD | GITHUB | LINK

Jul 2026

- Converted raw telemetry into autonomous fleet decisions, by layering specialized agents (BI insights, driver coaching, weather-aware range, vehicle assignment) on top of the core system.
- Forecasted battery failure before it occurred, instead of just flagging it after the fact by building an agentic Perceive-Reason-Decide-Act pipeline that reasons over risk profiles to predict RUL and trigger maintenance in real time.
- Confirmed the security layer stops attacks by simulating real BMS command-injection exploits and validating detection against them.

ACHIEVEMENTS

•Leadership

Aug 2026

Selected as the AWS Student Builder Campus Leader for BIT Mesra [Link]

•Top-Performer

Feb 2026

Ranked 15th at Mercer | Mettl's CodeSmash 4.0 among 1000+ participants. [Link]

•Top-Performer

Apr 2026

IMC Prosperity 4.0 finalist, finished in top 14 percent out of 18,000+ participants. [Link]

•Competitive Programming

Present

Max rated 4 stars on CodeChef platform. [Link]

EDUCATION

•Birla Institute Of Technology, Mesra

2023-Present

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.88

•Sarala Birla Public School, Ranchi

2020-21

Class 10th, CBSE

Percentage: 96.0

•Sarala Birla Public School, Ranchi

2022-23

Class 12th, CBSE

Percentage: 92.2

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Python, Java, JavaScript, TypeScript, PostgreSQL, Gherkin

Developer Tools: Git, GitHub, Gitlab, Postman, Grafana

Frameworks: React, Node, Express

Coursework: Operating Systems, DSA, DBMS, OOPs, Linux

POSITIONS OF RESPONSIBILITY

•Technical Content Head

2025 – Present

IEEE Student Chapter, BIT Mesra
